Make sure safety is always the #1 priority! Don't drink and drive!

Item# P5270 Keychain Breathalyzer

This breathalyzer is the perfect accessory for a night out! It is light weight and small with a convenient key chain so you can take it anywhere. You can keep it in your pocket, leave it in the car, or store it in your bag. With this keychain breathalyzer you don't have to play the risky guessing game. The breathalyzer has a power button and three simple indicator lights which read your BAC levels*. Simply hold the power button down and all three indicators will light up. Wait until the device is ready and only the green light is on. Then breathe into the mouthpiece for 3-5 seconds while continuing to hold down the power button. Depending on the light reading will tell your approximate BAC reading*. It requires 2 AAA batteries (not included). The keychain also has a LED micro-light next to the mouthpiece that is controlled by the side On/Off switch. It is a great promotional item for Insurance, Auto, Liquor & Beverage and Hospital industries.

- The red light indicates dangerous levels with BAC reading of over 0.08%
- The yellow light indicates caution levels with BAC reading between 0.05%-0.08%
- The green light indicates safe levels BAC reading between 0.00%-0.05%
